PROFILE

Full stack developer with 2 years of hands-on experience, building products from scratch with React, Next.js and Node.js. I use AI tools every day (Claude, OpenAI Codex, Cursor, Ollama, Groq, MCP) to ship faster, and I built Excaliclaw, a collaborative whiteboard made for AI agents. I created a custom CRM with n8n for a training center and I deploy and run my own servers with Docker and Dokploy. Self-taught, with professional certificates from Lanbide in software development. I like owning a product end to end.

EXPERIENCE

Full Stack Developer - Ceaformacion (Vitoria-Gasteiz) | Sep 2026

- Built a custom CRM with n8n that replaced the previous CRM, to nurture and follow up leads coming from WhatsApp.
- From the CRM, the team managed the time slots for student tests, and each booking created an order automatically, which organised the process.
- Reduced the hours the team spent on these tasks.
- Set up own servers using old computers and deployed self-managed services such as InsForge, n8n and DocuSeal.

EDUCATION

- Certificate of Professionalism: Web Technologies Application Development - Lanbide (Basque Employment Service)
- Certificate of Professionalism: Web Page Creation and Publishing - Lanbide (Basque Employment Service)
