PROFILE

Web developer with 2 years of hands-on programming experience in modern JavaScript (Next.js, React, Node.js) who likes testing new AI tools and ideas. I use Claude, OpenAI Codex, Cursor, Ollama, Groq and MCP in my daily work, and I built a custom n8n CRM that connected WhatsApp leads to an internal workflow. I am comfortable with Git, Docker and self-managed servers, and I enjoy turning unproven ideas into working prototypes. Self-taught, backed by professional certificates from Lanbide.

EXPERIENCE

Full Stack Developer - Ceaformacion (Vitoria-Gasteiz) | Sep 2026

- Built a custom CRM with n8n that replaced the previous CRM, to nurture and follow up leads coming from WhatsApp.
- The team managed student test time slots from the CRM, and each booking automatically generated an order, which organized the process.
- Reduced the hours the team spent on these tasks.
- Set up own servers using old computers and deployed self-hosted services such as InsForge, n8n and DocuSeal.

EDUCATION

- Professional Certificate: Web Page Creation and Publishing - Lanbide (Basque Employment Service)
- Professional Certificate: Web Technologies Application Development - Lanbide (Basque Employment Service)
