PROFILE

Web developer with 2 years of hands-on programming experience in TypeScript and the modern JavaScript ecosystem (Next.js, React, Tailwind CSS, Node.js), working AI-first every day with coding agents (Claude, OpenAI Codex, Cursor) and Model Context Protocol. Took a real business problem at a training centre from requirements to production: a custom n8n-based CRM fed by WhatsApp leads that replaced the previous CRM and cut the team's manual hours. Cares about how features look and feel, as shown in his interactive Next.js portfolio, and runs his own self-hosted infrastructure (Docker, Dokploy, VPS).

EXPERIENCE

Full Stack Developer - Ceaformación (Bergara, Spain)

Aug 2026 - Oct 2026

- Built a custom CRM with n8n that replaced the centre's previous CRM, to nurture and follow up the leads arriving from WhatsApp.
- From the CRM the team managed the time slots in which students came to take tests, and each booking automatically generated an order, which brought order to the process.
- Reduced the working hours the centre's team spent on these tasks.
- Set up self-hosted servers on repurposed old computers and deployed self-managed services such as InsForge, n8n and DocuSeal.

PROJECTS

- **Interactive personal portfolio - Next.js** (portfolio-ten-tawny-98.vercel.app): web app built with Next.js and Tailwind CSS, deployed on Vercel, with interactive components using animation physics (canvas, drag & drop, CSS 3D transforms) and dynamic QR code generation.
- **Excaliclaw** (excaliclaw.com): collaborative digital whiteboard native to AI agents.
- **Repositories & open source** (github.com/mounirb-dev): AI API integrations, n8n automations, self-managed deployments (Dokploy, VPS) and advanced React/Next.js UI components.
