PROFILE

Full stack web developer with 2 years of hands-on experience in the modern JavaScript ecosystem (Next.js, React, Node.js, Tailwind CSS) who builds products end to end: from the idea and the data model to the interface and the deployment. Works daily with AI tools and agents (Claude, OpenAI Codex, Cursor, Ollama, Model Context Protocol, n8n). Built a custom CRM with n8n that replaced a training centre's previous CRM, and runs self-managed infrastructure (n8n, InsForge, DocuSeal) on reused hardware. Self-taught, backed by professional certificates from Lanbide in software development.

EXPERIENCE

Full stack developer - Ceaformacion (Vitoria-Gasteiz) | Sep 2026

- Built a custom CRM with n8n that replaced the centre's previous CRM, to nurture and follow up leads coming from WhatsApp.
- From the CRM, the team managed the time slots in which students came to take tests, and every booking generated an order automatically, which organised the process.
- Reduced the working hours the team spent on these tasks.
- Set up own servers using old computers and deployed self-managed services such as InsForge, n8n and DocuSeal.

EDUCATION

- Professional Certificate: Web Page Creation and Publishing - Lanbide (Basque Employment Service), Basque Country
